DentiMax, Inc. Releases Latest Canadian Software Version

Designed specifically for Canadian dental practices, this latest version will not disappoint

Mesa, AZ, September 17, 2014 - DentiMax, Inc. released an updated version of DentiMax that includes features specifically designed to enhance the dental offices ability to quickly create treatment plans. DentiMax Co-founder David Arnett explains, "When a patient is in a dental chair being diagnosed, the ability to quickly apply the right CDA/CDHA procedures to a new treatment plan is really important. DentiMax always applies the correct root canal codes for their associated teeth and will even

allow you to create your own customized buttons for entering procedures. Entering correct procedure codes into DentiMax is fast." For over five years, Canadian dental offices have used DentiMax practice management software to successfully run their practices. Their software prices are surprisingly low for such a full feature software program. For more information on DentiMax, go to dentimax.com/canada or call (800) 704-8494

About DentiMax
