DentiMax, Inc. Releases Version 18

With a whole new look and great new features, practices can now upgrade to the latest version

Mesa, AZ, November 1, 2017 - DentiMax, Inc. announced the release of version 18 of its flagship practice management software. Available in both cloud and server editions, DentiMax 18 is more graphical, powerful and easier-to-use than any of its predecessors.

Company Co-founder David Arnett explains, "This latest release truly sets the standard for dental software, providing a dreamlike workflow for the dental practice. With an all

new clinical charting screen, larger fonts, and many new paperless enhancements, DentiMax 18 is smoother and even prettier to use than any other practice management software on the market."

Dental offices expressed a huge interest in a highly graphical clinical charting screen, tighter digital x-ray integration, integrated patient texting as well as paperless features such as an online and in-office patient kiosk. After working closely with dental practices for over four years, DentiMax has delivered these and other features as part of an integrated solution. Now practices can bypass using third-party products and get all the functionality they need from one system.

About DentiMax

Founded in February 2004, DentiMax, Inc. offers complete cloud and in-office dental practice management software as well as digital imaging software with x-ray sensors. The company consistently exceeds customer expectations by providing easy-to-use products and services at an exceptional value.
