DentiMax, Inc. Releases Document Management Software

This new release combines DentiMax's document center with practice management

Mesa, AZ, March 1, 2010 - DentiMax released the all new Document Center software. This newly released software allows dental offices to electronically capture, store and organize patient insurance cards, driver's licenses, patient signatures, and printed documents. Combining the Document Center with the DentiMax practice management system allows dental offices to go paperless.

Surprisingly, the DentiMax Document Center is priced at a fraction of what you would expect. For example, dental offices can choose a \$199 single computer version or choose a \$1,349 Network Bundle which includes a one sided ID scanner, full page scanner and signature pad. David J. Arnett, Co-Founder of DentiMax explains, "The Document Center provides the latest in dental software technology while at the same time maintains the low cost and ease of use that our customers expect. We continue to prove that high-end, full-featured dental software does not need to be so expensive."

About DentiMax

Founded in February 2004, DentiMax, Inc. offers complete cloud and in-office dental practice management software as well as digital imaging software with x-ray sensors. The company consistently exceeds customer expectations by providing easy-to-use products and services at an exceptional value.
