DentiMax, Inc. Releases New Dental Software Upgrade

DentiMax Practice Management Starts its Next Chapter as the New Version 08

Mesa, AZ, November 30, 2007 - DentiMax, Inc. released DentiMax '08, the latest upgrade to its practice management software. DentiMax is a complete software solution, designed to handle the dental office's financial, clinical and digital x-ray needs. This latest software release is packed full of features which include: advanced clinical charting, auto clinical notes, treatment planning, periodontal charting, prescription writing, patient payment plans, electronic claims as well as appointment scheduling with automatic recall. Add the DentiMax Imaging Module and bridge with over 25 different digital sensors, including Suni, Trophy, Schick, DentOptix, Sirona, Dental Ray and DEXIS.

By combining easy-to-use screens with a complete feature set and industry leading low prices, DentiMax has revolutionized the practice management market. Lee J. Varney, Co-Founder of DentiMax, Inc. explains, "DentiMax continues to raise the bar by improving the way information seamlessly flows between the operatories and the front desk. From the charting screen, you can post procedures directly to the ledger and are literally one click away from digital x-rays, clinical notes, treatment planning and medical alerts."

About DentiMax

Founded in February 2004, DentiMax, Inc. offers complete cloud and in-office dental practice management software as well as digital imaging software with x-ray sensors. The company consistently exceeds customer expectations by providing easy-to-use products and services at an exceptional value.
